Contract ED-13, [REDACTED]

Residual Materials

25X1

REF : (a) Memo from [REDACTED], Chief, Adm. & Insp. Branch to
Chief, Eng. Div., OC, dated 17 July 1953, NCM3-2381

25X1

1. Ref (a) covered transmittal of lists of tools, dies, fixtures, parts and materials acquired by contractor during contract performance and requested approval and recommendations for disposition thereof.

2. Examination of Exhibit "A" indicates that it is incomplete and erroneously named. Only the following 4 items in this list can be definitely identified as a tool, die or fixture:

10 MM Tap for Spark Plug
Part No. 20042 Piston Core Box Only
Pole Tip Lamination Die
Stator Lamination Die

The remaining items in Exhibit "A" should be listed in Exhibit "B", since they are apparently spare parts for the engine-generator.

3. It would be extremely difficult to build such a precision unit using only the above listed tooling. For example, approximately \$7000.00 of government funds was used on subject contract for die-casting dies alone.

4. No suggestions for disposition of these items will be given at this time since the lists are obviously incomplete and therefore, unsatisfactory.
